Beech Curriculum - Term 2 2026

We are Authors:

In English, we are exploring, 'The Three Little Pigs' as part of our author's unit. The children will develop their creative writing skills by writing a wanted poster for the Big Bad Wolf and creating an alternative ending to the story. We will focus on writing to entertain, using exciting vocabulary to engage the reader. The children will use expanded noun phrases using adjectives and describe actions in more detail using adverbs of manner, helping them to make their writing more descriptive and interesting.

We are Mathematicians:

Year 2 will continue their addition and subtraction unit and will focus on comparing number sentences and missing number problems. They will then learn about multiplication and division and finally they will look at 2D and 3D shapes, find lines of symmetry and patterns. Year 3 will continue using column addition and subtraction to tackle big questions and then will learn about multiplication and division, focusing on the 2, 3, 4 and 8 times tables. Please make sure your child spends time on TTRS to help them.

We are Theologians, Philosophers and Sociologists

In this unit, children will explore the Christian belief in the Trinity and learn how Christians understand God as Father, Son and Holy Spirit. They will investigate how the Trinity is shown in Bible stories, worship and symbols, and consider why this belief is important to Christians today. Children will also explore the meaning of baptism and discover how it reflects Christian beliefs about the Trinity and belonging to the Christian faith.

We are Geographers:

During this geography unit, we will be exploring the similarities and differences between Canada and the UK, comparing their landscapes, climates and ways of life. To bring our learning to life, the children will create an engaging travel brochure, using persuasive and descriptive language. In our writing, we will focus on using commas in lists and correctly punctuating questions, statements and exclamations.

We are Scientists

During this science unit, we will be exploring everyday materials, investigating their properties and discovering how they are used for different purposes. To share our learning, the children will write an instruction manual, focusing on writing to explain clearly and in a logical order. In our writing, we will develop our use of subordinating conjunctions to explain reasons and adverbs of time to show when events or steps happen.

We are Designers

We will be exploring how to design and make structures, focusing on creating our own wooden houses. The children will learn how to use templates to measure, mark and cut materials accurately, as well as explore different techniques for joining materials together to create a strong and stable structure.

Additional Information

- PE kit is to be sent in at the beginning of each week and taken home at the end of every week.
- Home learning will be sent home on Thursdays and expected in by the following Tuesday.
- Our value this term is respect.
